Route 1, Beach Area Improvements

20-125-01

05-53211

Project
Description

The proposed projects to be included in these improvements are the result of Phase I of the SR 1 Grid Study. Further development of proposed solutions and alternatives, as well as public involvement, will be necessary before these projects can move forward to design.

Project
Justification

These projects will improve pedestrian and bicycle safety and make needed roadway improvements.

Nassau Pedestrian/ Bicycle Connection	23-125-02	05-53216

Project Description	<p>This project provides a new relocated section for a portion of the American Discovery/Millennium Trail, making use of the existing grade separation between SR 1 and the DelDOT-owned railroad tracks at Nassau. A pedestrian and bicycle crossing of SR 1 away from the Five Points intersection will also be provided. Future expansion to the east and west would need to be done as part of other projects.</p>
----------------------------	--

Project Justification	These projects will improve pedestrian and bicycle safety and make needed roadway improvements.

Project Title**Project #****Primavera #****Beach Area Park and Ride****26-125-02****05-53213****Project
Description**

The purpose of this project is to determine the need for a new park and ride facility, or several smaller, satellite facilities, located north and west of the SR1 corridor. This study will also explore ways to improve and enhance use of the existing Rehoboth Park & Ride facility near the entrance to Rehoboth Beach. Review of the existing park and ride site, and the need for additional facilities are part of an overall multimodal strategy to improve access along the SR1 corridor encompassing Lewes, Rehoboth Beach, and Dewey Beach, Delaware to local destinations, especially beach, residential and shopping areas.

**Project
Justification**

This project will improve pedestrian and bicycle safety and transit services in the resort area.

Old Landing Road and S275, Warrington Road Intersection Improvements**07-22505****Project
Description**

The project will provide improvements at the intersection of Old Landing Road (S274) and Warrington Road (S275) to increase the capacity of the intersection.

**Project
Justification**

As a result of increased residential development in the area, the intersection of Old Landing Road and Warrington Road has experienced a high increase in traffic volumes and delay.

Funding Program ROAD SYSTEMS - ARTERIALS

Project Title	Project #	Primavera #
BR 3-156 on SR 1 on Indian River Inlet Roadway & Approaches	23-073-03	04-00090

**Project
Description**

As part of the overall Indian River Inlet Bridge Replacement Project, Contract #23-073-03 includes the following work:

The temporary realignment of the SR-1 travel lanes approaching the existing bridge. The temporary four-lane divided lane configuration will be maintained until Year 2010.

The reconstruction of Access Roads A, B and C on both the north and south sides of the inlet. These roads provide access to Delaware Seashore State Park facilities, U.S. Army Corps of Engineers facilities, the U.S. Coast Guard Station, and private residences.

Construction of the north and south approach embankments to the new bridge. The new embankments will be constructed just west of the existing SR-1 bridge alignment and will provide for two 12-foot lanes, a 10-foot outside shoulder, and a 4-foot inside shoulder in each direction. An additional 10-foot wide pedestrian/bicycle walkway will be constructed on the east side of the embankment. In order to minimize the footprint of the new bridge approaches, vertical retaining walls will be constructed on the west side and portions of the east side of the embankment.

Relocation of electric, water, and sewer utilities.

Environmental mitigation including construction of wetland mitigation sites and a new terrapin habitat.

BR 3-156 on SR 1 on Indian River Inlet Roadway & Approaches (Continued)**Project
Justification**

The swift current of the Indian River inlet has caused excessive erosion or scour of the channel bottom. This condition has led to the exposure of the existing bridge foundation and support piles to a level, which necessitates the replacement of the bridge. The new bridge will be constructed eliminating supports in the inlet channel. The bridge currently ranks 29th out of 1,399 on the Department's bridge deficiency list (via the bridge management program).

Project Title	Project #	Primavera #
BR 3-156, Indian River Inlet Park Enhancements	25-073-03	05-00209

**Project
Description**

In order to mitigate the park impacts created by the bridge project, improvements to the park's facilities will be provided. As part of these improvements new RV sites, camp sites, bath houses, laundry facilities, contact stations, recreational areas and playground areas will be constructed. In addition, improved pedestrian and vehicular access to the beach, parking areas, and park facilities will be provided.

**Project
Justification**

The proposed replacement of BR 3-156 includes the realignment of SR 1 to the west of the existing roadway. The new alignment and the construction activities associated with the new bridge and roadway approach work, will create temporary and permanent impacts to the park. In order to mitigate these impacts, park improvements will be performed.

Project Title	Project #	Primavera #
BR 3-156, Indian River Inlet Bridge Demolition	25-073-04	05-00210

**Project
Description**

Upon completion of the new SR 1 bridge over the Indian River Inlet, the existing BR 3-156 and portions of the existing SR 1 roadway approaches will be demolished under this contract.

**Project
Justification**

Excessive erosion (or scour) of the Indian River Inlet channel bottom has led to the partial exposure of the existing bridge foundation and support piles to a level, which necessitates the replacement of the bridge. Once the new bridge is constructed, the existing bridge and roadway approaches will need to be demolished in accordance with the project permits.

Project Title	Project #	Primavera #
BR 3-156, Indian River Inlet Bridge Replacement (Design Build)	26-073-03	05-00211

**Project
Description**

The design and construction of a new bridge along SR 1 over the Indian River Inlet will be performed utilizing the Design-Build project delivery approach. The replacement bridge will alleviate the safety risk caused by the present scour condition at the foundations. To do this, the new structure will completely span the inlet with all foundation members constructed on dry land.

The proposed alignment will be west of the existing bridge. The location of the new bridge will be at the approximate location of the old bridge, which preceded the existing bridge. The replacement bridge and its approaches will be designed for construction to not disrupt traffic on the existing roadway except at the time of the construction tie-ins.

The support piers for the replacement bridge will be placed outside the inlet on land. The current inlet width at the existing bridge is approximately 500 feet. Pier placement will allow for future expansion of the inlet. Using these parameters, an approximate maximum span length will be 1,000 feet, assuming an inlet expansion to 800 feet. The inlet currently expands to 800 feet just west of the proposed bridge location. The new bridge will increase the navigational clearance from 35 feet to 45 feet and maintain a minimum underclearance of 30 feet over land areas.

The new roadway cross-section will be increased in width to increase safety to pedestrians and bicyclists. The new cross-section will include two twelve-foot wide lanes in each direction separated by a median with minimum four-foot interior and ten-foot exterior shoulder widths. In addition, a separate 12-foot wide pedestrian walkway will be provided on the ocean-side of the bridge. Each side of the walkway will be protected with barriers. The approaches will be constructed (under separate contract) on an embankment, similar to the existing

BR 3-156, Indian River Inlet Bridge Replacement (Design Build) (Continued)

bridge. Maximum approach grades of 4.0% will be maintained for the roadway approaches. The structure type will be determined as proposed by the successful Design-Builder. Structural Steel will not be permitted for the primary bridge components.

Other project work being performed under separate contracts will include the construction of the new roadway approach embankment and retaining walls, new access roads to the state park areas, the demolition of the existing bridge, the removal of the existing roadway approach embankments, state park improvements due to the direct impact of the bridge, utility relocations, environmental mitigation and other park area improvements.

**Project
Justification**

Excessive erosion (or scour) of the Indian River Inlet channel bottom has led to the partial exposure of the existing bridge foundation and support piles to a level, which necessitates the replacement of the bridge. The new bridge will be constructed eliminating supports in the inlet channel. The bridge currently ranks 29th out of 1,399 on the department's bridge deficiency list (via the bridge management program).

HSIP - Sussex County

07-22530

Project
Description

This program is a federally funded program to identify locations and reduce the severity and frequency of accidents. This is done through the identification of locations, accident patterns, conducting field studies, and developing potential solutions. The program utilizes a technical committee to review identified locations with a focus towards implementation of low cost high benefit solutions (signing, striping, signals). However the program does identify several locations each year that involve large scale design and capital construction projects. HSIP funds are designated within specific project requests. The proposed projects to be addressed in this program are as follows:

Intersection Improvements US 113 and SR 20

Intersection Improvements US 113

US 13 at Brickyard Road

US 9 at Dairy Farm Road

US 9 at Dairy Farm Road/Sweetbriar Road (Interim)

US 9 at Hudson Road/Fisher Road

US 9 and SR 30, Intersection Improvements

Project
Justification

These improvements are federally mandated safety programs and intersection programs that provide safe turning movements

Project Title	Project #	Primavera #
SR 26, Alternate Route, SR 17 to S361, Sussex East/West Corridor	21-112-04	04-00028

**Project
Description**

The proposed improvements will include construction of 11-foot lanes, two five-foot shoulders, and turn lanes at intersection with a 14-foot clear zone through a series of roadways including S353, Burbage Road, S352, Windmill Road, S 84, Central Avenue, and S368, Beaver Dam Road. Minor realignment along Beaver Dam Road on to the Village of Bear Trap Dunes will also be included.

**Project
Justification**

In the summer and fall of 1998, the department collected traffic count data on SR 26 from US113 to the Assawoman Canal. Based on the traffic information and an inventory of existing conditions in the study area, a Project Needs Report was completed in February 1999. The Needs Report identified four factors that contribute to the need for improvements to SR 26. Those needs are to reduce traffic congestion, improve safety, establish defined property entrances and exits, and improve roadway conditions. The SR 26 Advisory Committee, a group that includes local government leaders, business owners, developers, and local residents, concurred with the conclusions included in the Needs Report as discussed above.

Project Title	Project #	Primavera #
SR 26, Atlantic Avenue from Clarksville to Assawoman Canal	24-112-10	04-00800

**Project
Description**

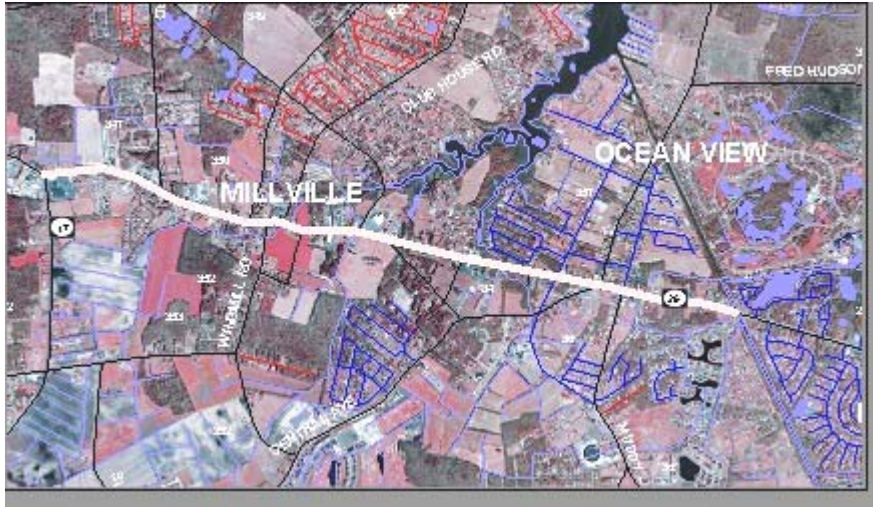

This project was a result of the recommendations of the SR 26 Planning Study and includes improvements to intersections and the addition of five-foot shoulders along the SR 26 corridor from Clarksville to the Assawoman Canal. Sidewalks will be constructed from Windmill Road (S362) to the Assawoman Canal.

The typical section for this project is two 11-foot travel lanes, two 5-foot shoulders, and a 12-foot continuous center left turn lane. The section from Clarksville to west of Railway Road will be an open section with roadside ditching for drainage. The section from west of Railway Road to the Assawoman Canal will be a closed section with curb, gutter, and closed drainage. The majority of the closed section will also have a 3-foot grass strip behind the curb and gutter, as well as 5-foot sidewalks (from Windmill Road to the Assawoman Canal). Right turn lanes are being added at most intersections.

The intersection of SR 26 and Central Avenue will be realigned, and turn lanes will be added in each direction.

**Project
Justification**

In the summer and fall of 1998, the department collected traffic count data on SR 26 from US 113 to the Assawoman Canal. Based on the traffic information and an inventory of existing conditions in the study area, a Project Needs Report was completed in February 1999. The Needs Report identified four factors that contribute to the need for improvements to SR 26. Those needs are to reduce traffic congestion, improve safety, establish defined property entrances and exits, and improve roadway conditions. The SR 26 Advisory Committee, a group that includes local government leaders, business owners, developers, and local residents, concurred with the conclusions included in the Needs Report as discussed above.

Project Title**Project #****Primavera #****S266 New Road, Nassau to Pilottown Road, Lewes****24-125-02****04-00958****Project
Description**

This project will provide the addition of shoulders that will allow safe bicycle trips from the intersection of SR 1 and S266B, Nassau Road to the Town of Lewes. The shoulders will also provide for additional safety for boat trailers traveling from SR 1 to the proposed boat launch ramp on S267, Pilottown Road.

**Project
Justification**

This project will improve pedestrian and bicycle safety and make needed roadway improvements. Part of Proposed American Discovery Trail Bike Route. Project Submitted by Mr. George H.P. Smith, Mayor of Lewis.

Description**

The Dewey Beach Pedestrian Study provided a concept for the improvement of seasonal pedestrian travel on and across SR 1. The project limits extend from the Dewey Beach border in the north at the intersection of SR 1 and Bayard Street, to the Dewey Beach border in the south just below Collins Street. Improvements include modifications to the median, sidewalk widening, and shoulder reconstruction along SR 1 from Collins to Swede.

**Project
Justification**

This project was developed from the Dewey Beach Pedestrian Study (20-013-04). It will improve pedestrian and bicycle safety and make needed roadway improvements.

Rehoboth Beach Entrance Improvements	24-125-01	04-00008

**Project
Description**

This project improves operations and safety into and out of Rehoboth Beach in the area around SR 1 and SR 1A (Rehoboth Avenue). It also includes elements that were requested by the eastside communities, such as West Rehoboth (for connecting between eastside communities and Rehoboth Beach). Multi-use access would be provided for bicyclists and pedestrians by a connection with the Department of Natural Resources and Environmental Control's Lewes to Rehoboth multi-use trail north of Hebron Road.

**Project
Justification**

The SR 1 Legislative Sub-committee recommended that medium and long range improvements be made at the Rehoboth Entrance to improve operations and safety. This project is to develop these improvements including bicycle and pedestrian improvements.

SR 1, SR 24 to North of US 9 (Five Points) (Third Lane)

22-125-01

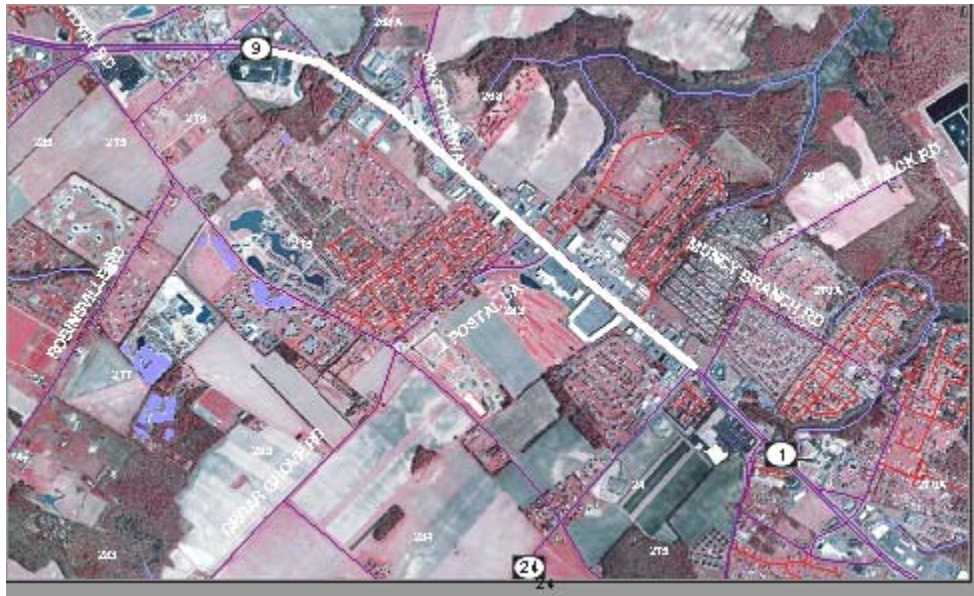

04-00019

Project
Description

The project involves widening Southbound SR 1 to include a third travel lane from SR 24 to Five Points. The project will ultimately replace the multi-use lane providing a travel area for buses, bikes and right turning vehicles. Included in the project is the addition of sidewalk from SR 24 to 1000 North of Five Points adding approximately 2.75 miles of additional sidewalk to the south bound side of SR 1.

Project
Justification

These projects will improve pedestrian and bicycle safety and make needed roadway improvements.

SR 1, Rehoboth Canal to North of Five Points, Pedestrian Improvements	26-125-01	06-00958

**Project
Description**

This project will provide sidewalks along SR 1 from North of Five Points to the Rehoboth - Lewes Canal. The project may provide for pedestrian crossings of SR 1 at locations to be determined.

**Project
Justification**

The project was recommended by the SR 1 Pedestrian Study and will enhance pedestrian safety in the beach area.

SR 1A, Dewey Beach Pedestrian/Bicycle Improvements

04-00007

Project
Description

The Dewey Beach Pedestrian Study provided a concept for the improvement of seasonal pedestrian travel on and across SR 1A. The project limits includes SR 1A from the intersection with SR 1 north to the Rehoboth border at Silver Lake. Improvements include a new sidewalk along one side of SR 1A (side to be determined) and shoulder and intersection enhancements for bikes and pedestrians between St. Louis Street and Robinson Drive.

Project
Justification

These projects were developed from the Dewey Beach Pedestrian Study (20-013-04) and will improve pedestrian and bicycle safety and make needed roadway improvements.

SR 1/SR 1A and SR 1/SR 1B Intersection Improvements		04-11922

**Project
Description**

This project provides for operational and safety improvements at the SR 1/SR 1A split at the Rehoboth Entrance and the SR 1/SR 1B intersections.

**Project
Justification**

The SR 1 Legislative Sub-committee recommended that medium and long range improvements be made at the Rehoboth Entrance to improve operations and safety. This project is to provide operational and safety improvements to the intersections of SR 1/SR 1A and SR 1/SR 1B.

Project

Primavera

US 9 & S319, Airport Road Realignment, Georgetown.

25-046-01

04-00004

Project
Description

This project will realign a skewed intersection at US 9, Lewes Georgetown Highway and S 319, Airport Road, located in Georgetown. Intersection turn lanes, auxiliary through lanes, traffic signal improvements and pedestrian facilities (sidewalk, crosswalks) will be added. (This project is on hold until a comprehensive storm water management plan is developed and approved by Sussex County.)

Project
Justification

The Level of Service is expected to deteriorate to unacceptable levels. Operational difficulties include the acute skew of each S 319, Airport Road approach to the intersection as well as sight line restrictions.

Project Title**Project #****Primavera #****US 113, North/South Improvements****22-127-01****04-00020****Project
Description**

This project study will continue to work on viable alternatives for a limited access highway throughout Sussex County to address existing and future transportation needs along US 113 while preserving environmental and historic resources and accommodating planned economic growth. The expectation is that Ellendale will be an EA Project, Georgetown through Selbyville will be an EIS project. Milford will be an EIS Project as well.

**Project
Justification**

An initial feasibility study for a north/south limited access highway through Sussex County to ease traffic congestion was completed in FY 2002. This additional funding will continue this study in more depth.

US 13, Laurel Intersections Improvements	22-124-04	04-00026

**Project
Description**

This project consists of increasing the length of the existing right-turn lanes on eastbound and westbound approaches of US 9, County Seat Highway; adding left-turn lanes on the eastbound and westbound approaches of S466, Delaware Avenue; and removing split phasing from the signal, adding left-turn lanes on the eastbound and westbound approaches of SR 24, and adding a northbound acceleration lane from S462, Trussum Pond Road to US 13, Sussex Highway. Extensive pavement rehabilitation will be done at the intersections of US 13 and US 9, S466, SR 24, and S462, Trussum Pond Road to correct rutting problems. In addition, US 13 will get a two-inch mill and overlay between these intersections.

Contract No. 22-124-02, Laurel, Five Points Intersection has been attached to this contract. The Five Points contract is an intersection improvement in downtown Laurel.

**Project
Justification**

These intersection improvements will provide additional corridor capacity and improve safety in all the locations. The work at Five Points was recommended improvements from the Laurel Truck Route Study.

US 13 / DE 404 Intersection Realignment and Bridgeville Service Road

22-124-06

04-00030

Project
Description

This project involves the realignment of the US 13 and SR 404, North Main Street intersection to form a perpendicular intersection. The realignment will eliminate the skew and add turn lanes at this intersection. Further, this project will construct parallel service roads on both sides of US 13 (from S545, Rifle Range Road to SR 404, North Main Street) at this intersection.

Project
Justification

This realignment will improve both flow and safety at this intersection. The service roads will help reduce traffic congestion and preserve capacity along the US 13 corridor.

SR 1, Coastal Highway, SR 30, Cedar Creek Road, Interchange, South of Milford		04-00616
Project Description	<p>This project includes the construction of a grade-separated interchange at this intersection with a proposed on/off access interchange provided along SR 30 and Cedar Neck Road (S206). This project will connect with the recently completed roadway from Business Route 1 and SR 30. The project will also include limiting access along S206 to right-in or right-out only access.</p>	
Project Justification	<p>This intersection has been targeted as a high accident-prone intersection. The improvements will enhance safety and preserve capacity along the SR 1 corridor eliminating the need for signalization at this intersection.</p>

US 13, Seaford Intersection Improvements

24-124-01

04-00033

Project
Description**US 13, Seaford Intersection Improvements**

At S534, Herring Run Road/Tharp Road, SR 20, Stein Highway, S535, Middleford Road, and S20, Concord Road will include modifications to the signal timing/phasing and addition of separate left-turn lanes.

US 13, Sussex Highway and US 13A, Bridgeville Highway, S46, Old Furnace Road Intersection

To improve safety and remove duplicate traffic movements. The high-speed entrance to US 13A, Bridgeville Highway southbound from US 13, Sussex Highway will be replaced by a low speed, rights-in / rights-out to the south of S46, Old Furnace Road. In addition, access to US 13A, Bridgeville Highway from S46, Old Furnace Road will be provided by a connector road to the west of US 13A, Bridgeville Highway.

Project
Justification

The intersection improvements will provide additional capacity and improve safety at these intersections. In addition, the US 13, Sussex Highway/S46, Old Furnace Road intersection section of roadway was listed in the 1998 Highway Safety Improvement Program (HSIP) as a site having a high rate of accidents.

S275, Plantations Road			04-92847
Project Description	This road could serve as an alternate SR 1, Coastal Highway from SR 24, John J. Williams Highway to SR 9, Lewes-Georgetown Highway. Possible improvements include four 12-foot travel lanes with five-foot paved shoulders, three-foot grass buffers, and a five-foot sidewalk.		
Project Justification	This area was identified as a high priority by Sussex County Council due to high development growth in the corridor over the last several years.

Woodland Ferry Vessel, Bulkhead and Ramp Replacement	25-500-49	05-31124

**Project
Description**

The following language was in the FY 2005 Capital Bond Bill for the replacement of the Woodland Ferry, Bulkhead and Ramp Replacement. The ferry will be purchased with funds authorized under the Statewide Equipment Program. The General Assembly took note of the unique and historic character of the Woodland Ferry, which operates, from time to time across the Nanticoke River near Seaford. In order to improve the reliability and safety of this service, the department is authorized and directed to take such steps as are necessary to acquire a safe and attractive previously owned vessel that would be in keeping with the important traditions established by this service. If the department in its judgment is unable to acquire such vessel, it shall undertake the design and construction of a new replacement ferry. Because time is of the essence, the department may exercise the authorities granted to it for emergency sole source contracting of goods and services without regard to any limits elsewhere designated in law. In addition, the department may use similar authorities to make necessary improvements to the ramps and bulkheads on either riverbank.

**Project
Justification**

The current bulkhead and ramps need to be replaced, as the ferry does not meet the ramps at different tidal depths.

Lewes Boat Ramp

05-53215

Project
Description

Funding has been reserved to improve the infrastructure to allow easier access from Route 1 to the new Lewes Boat Ramp on S267, Pilottown Road. A final design alternative has not yet been selected, but alternatives include using S266, New Road, that could be added to the project in the current statewide Bicycle, Pedestrian and other improvements project; or upgrade of the roadway through the University of Delaware campus.

Project
Justification

These projects will improve pedestrian and bicycle safety and make needed roadway improvements.

S298 Banks Road Improvements S22 to SR 24	24-112-03	04-00639

**Project
Description**

The road is currently surface treated, with 11-foot travel lanes, no paved shoulders, and open drainage. The proposed improved section of Banks Road would consist of pavement resurfacing of the two 11-foot travel lanes, the addition of two four-foot paved shoulders and closed drainage system. Intersection improvements including left-turn lanes are proposed for the intersection of Banks Road at SR 24. The developer of Baywood is required to improve the intersection of Banks Road, Long Neck Road, and S 298, School Lane.

**Project
Justification**

This area was identified as a high priority by Sussex County Council due to high development growth in the corridor over the last several years. Purpose is for safety issues as well as converting the road to Hot Mix.

Project Title	Project #	Primavera#
S279, Camp Arrowhead Road Spot Improvements	25-112-02	04-00955

**Project
Description**

Camp Arrowhead Road is currently surface treated, with 11-foot travel lanes, no paved shoulders, and open drainage. The proposed improved section of Camp Arrowhead Road would consist of pavement resurfacing of the two 11-foot travel lanes (conversion to hot mix) and the addition of two five to 8-foot paved shoulders. The existing drainage throughout the project limits consists exclusively of open drainage facilitated by roadside ditches or sheet flow off of the road. There are drainage problems at the southern end of the Marsh Island Golf Course. Three to four feet of standing water sometime occur after heavy rainstorms. Improvements will be made to the drainage that may include partial closed drainage system. The S-curve between S279A (Waterview Road) has had an unusually high number of accidents based on a review of accidents between 2000 and 2003. Redesign of the curve and/or safety improvements for the curve will be included in the project.

**Project
Justification**

This area was identified as a high priority by Sussex County Council due to high development growth in the corridor over the last several years.

Project Title	Project #	Primavera#
S318 Patriots Way / S328 Barks Pond Road US 113 to S48 Zoar Road	25-112-01	04-00957

**Project
Description**

This project is located between US 113 and S48, Zoar Road and is approximately 2.5 miles in length. Patriots Way makes up the majority of the project length starting at S48, Zoar Road and ending at S86 Avenue of Honor. However, in order to provide continuity to US 113, the project also includes improvements to Avenue of Honor. The new Sussex Central High School is located along S318, Patriots Way and improvements are needed for the additional bicycle, pedestrian and bus use. Patriots Way and Avenue of Honor currently have a hot mix surface with 11-foot travel lanes, no paved shoulders, and open drainage. The proposed improved section of Patriots Way would consist of pavement resurfacing of the two 11-foot travel lanes and the addition of two five to 8-foot paved shoulders. The proposed improved section of Avenue of Honor would consist of pavement resurfacing of the two 11-foot travel lanes and the addition of two eight-foot paved shoulders. Drainage problems in the vicinity of S317, Peterkins Road will be investigated. Drainage improvements for the remainder of the project limits will consist of a combination of open and closed drainage systems. The S-curve on Patriots Way, located just north of Sussex Central High School, will be investigated for safety improvements in addition to replacing the two large culverts.

**Project
Justification**

This area was identified as a high priority by Sussex County Council due to high development growth in the corridor over the last several years and came from the SR 24 Mainline Planning Study.

Alternate SR 24 Signs and SR 24 (Phase II) Improvements at S48, Zoar Road, S325	24-112-08	04-08835

**Project
Description**

This project will establish an alternate SR 24 along SR 23 from S48 to S275, Plantations Road, and from US113, DuPont Boulevard along S48, Zoar Road to SR 23, Beaver Dam Road with signage. Phase II will include improvements at S48, Zoar Road/S325, Speedway Road and S326, Bethesda Road and intersections improvements at SR 24, John J. Williams Highway/S277, Angola Road and SR 24, John J. Williams Highway/SR 30, Gravel Hill Road.

**Project
Justification**

This area was identified as a high priority by Sussex County Council due to high development growth in the corridor over the last several years.

BRIDGES

Bridges

Project Title	Project #	Primavera#
BR 3-122 on S567A, Handy Road over Houston Branch, Bridgeville	24-073-02	04-01111

**Project
Description**

This project will consist of replacing the existing pipes with a precast double-cell box culvert. Other work will include placing riprap for scour protection, reconstructing the approach roadways, and placing steel beam guardrail.

**Project
Justification**

The existing structure consists of three corrugated steel pipe culverts in very poor condition due mainly to the severe corrosion that is taking place throughout the pipe culvert. The bottoms of the pipes have deteriorated completely in several locations. The bridge currently ranks 17th out of 1,399 on the Department's bridge deficiency list (via the bridge management program).

Project Title	Project #	Primavera#
BR 3-151 and BR 3-164, Seaford, Emergency Repairs	24-474-22	04-00999

**Project
Description**

Bridges 3-151 and 3-164 are both movable bridges that suffered significant damage to the mechanical and electrical systems as a result of Hurricane Isabel. Bridge 3-151 currently does not open. The house for the mechanical and electrical system for Bridge 3-164 becomes submerged during higher than normal tides. The proposed work includes rehabilitation or replacement of many parts of the electrical and mechanical systems for both bridges. Bridge 3-151 will be restored to operational condition. Bridge 3-164 will have equipment better at resisting the water.

**Project
Justification**

Bridges 3-151 and 3-164 are both movable bridges that suffered significant damage to the mechanical and electrical systems as a result of Hurricane Isabel. Bridge 3-151 currently does not open and is blocking a navigable waterway. Bridge 3-164 spans a navigable waterway used significantly by commercial fishermen and has its equipment house submerged during higher than normal tides. Both bridges must be rehabilitated to restore and maintain full operational capabilities.

Project Title	Project #	Primavera#
BR 3-237 on Old Furnace Road over Nanticoke River	25-076-02	04-00885

**Project
Description**

This bridge was built in 1919 and has been designated as a historic bridge. It is finished with concrete parapets in incised rectangular panels and is supported on concrete abutments with U-shaped concrete wing walls. Flared timber wing walls have been added in an effort to arrest erosion of the embankments. The improvements will include partial replacement of the bridge on S 46, Elks Road by repairing spalls on the existing concrete arch; widening the arch with matching shape and parapets and installing guardrails at bridge approaches. The existing roadway section will also be widened.

**Project
Justification**

This bridge is functionally obsolete and ranks 61st out of 1,399 on the department's bridge deficiency list (via the bridge management program). Bridge inspection reports indicate that sections of the concrete arch are delaminated with exposed reinforcements. The report also shows that spalls are located on the arch and rails, and several spalls on the railing have exposed rebar. Scour is present on the south side of the arch, extending in from the channel.

Project Title	Project #	Primavera#
BR 3-707 on SR 1-A over Silver Lake, Rehoboth	26-076-01	05-99904

**Project
Description**

The existing timber piles are exhibiting significant deterioration at the water line. The proposed work includes installing FRP pile jackets and grouting around the existing timber piles to prevent further deterioration. The substandard wire rope guardrail will be replaced with standard steel beam guardrail.

**Project
Justification**

The existing timber piles are showing significant deterioration. The rest of the bridge is in good condition as a result of the superstructure rehabilitation performed in the mid 1990's. Because of the deteriorated piles, the bridge has a deficiency rank of 59.

Project Title	Project #	Primavera#
BR 3-918 on SR 30 at Reynolds Pond, Milford	24-073-05	04-00091

**Project
Description**

This bridge carries SR 30, Isaacs Road over Sowbridge Branch, the outlet of Reynolds Pond. Downstream of the bridge the landscape includes a wooded stream corridor with wooded floodplain wetlands while on the upstream side of the bridge a wooded wetland fringe surrounds Reynolds Pond. The neighboring landscapes include both residential areas as well as agricultural lands. The existing structure consists of a four-sided concrete structure and a spillway constructed of removable wooden planks, which control the pond elevation. A three-foot diameter pipe located approximately 500-feet north of the bridge also helps carry the base-flow from the pond.

This bridge was originally part of the Milton Truck Bypass project (21-046-01), but has since been moved out to be a separate project. It was removed due to construction design constraints. The project involves the replacement of existing four-sided structure with a wider concrete box culvert and construction of a new spillway. To address flooding concerns, the existing sluice gate spillway will be replaced with an 80-foot long semi-circular spillway. The proposed spillway will be 55-feet along the roadway. The three-foot diameter base-flow pipe north of the bridge will also be replaced. The placement of riprap and minor approach roadway work including the replacement of guardrail will also take place. Right of Way is required for wetland mitigation.

**Project
Justification**

The bridge is structurally deficient and too narrow, creating a pinch point on SR 30, Isaacs Road and a subsequent concern. Bridge 3-918 currently ranks 440th out of 1,399 on the Department's bridge deficiency list (via the bridge management program).

Project Title**Project #****Primavera#****Lake Gerar Bridge****07-23595****Project
Description**

The project includes :

- Replacement of the Lake Gerar Bridge and the reconstruction of its approaches;
- Landscaping associated with the replacement of the Lake Gerar Bridge;
- Lighting associated with the replacement of the Lake Gerar Bridge; and,
- Utility relocations associated with the replacement of the Lake Gerar Bridge.

**Project
Justification**

According to a series of inspections and a report commissioned by the City of Rehoboth Beach, the Lake Gerar Bridge is in an advanced state of disrepair and needs to be replaced. The City of Rehoboth Beach received a \$1.6 million earmark through the federal SAFETEA-LU legislation for the replacement of the bridge and the funds are being administered through the Department.

Georgetown Maintenance Building Lift Replacement		06-53211

**Project
Description**

This project will replace the inground lift used for bus maintenance at Georgetown Maintenance Facility.

**Project
Justification**

The lift manufacturer went out of business, and the ability to get replacement parts is limited. Failure to replace the lift will impact DART's ability to properly maintain fixed route and paratransit fleets.
